Professional Summary

AI-focused Automation Engineer with **14+ years of experience** applying intelligent automation to QA workflows. Skilled in designing Selenium and Java automation frameworks, integrating LLMs, and building AI-powered agents and reusable skill files that reduce repetitive testing effort and accelerate delivery. Proven success in reducing testing time by 30% and manual testing effort by 60%, with experience leading automation teams and delivering scalable quality solutions.

Technical Skills

- **Testing and Automation:** Selenium WebDriver, TestNG, POM Framework, BrowserStack
- **Programming:** Java, API Testing, REST Services
- **Build and CI/CD:** Maven, Jenkins, Bitbucket, Git
- **AI and QA Tools:** AI Prompting, AI Agent Development, Skill File Creation, LLM Integration
- **Methodologies:** Agile, Scrum, SDLC, STLC
- **Testing Types:** Functional, Regression, Smoke, Integration, System, Performance

Professional Experience

Software Test Analyst Senior

FIS Global Business Solutions India Pvt. Ltd. | Feb 2020 - Present

- Designed and implemented a Selenium automation framework using the Page Object Model, improving maintainability and scalability.
- Integrated the automation suite with BrowserStack for cross-browser and cross-platform execution.
- Developed comprehensive automated testing solutions, reducing manual testing effort by 60%.
- Created AI-powered test agents and skill files to automate repetitive QA processes.
- Built custom automation solutions using Java, resulting in a 30% reduction in testing time.
- Led a four-member automation team, providing technical guidance and mentoring.
- Conducted performance testing, analyzed results, and recommended application optimizations.
- Executed regression testing on STG and PROD environments and reported anomalies.
- Created and maintained test cases for regression, smoke, and integration testing.

Senior Software Engineer

Diebold Nixdorf India Pvt. Ltd. | Apr 2019 - Feb 2020

- Created test scenarios and test cases based on business requirements.
- Executed test cases, logged defects in Jira, and resolved tickets with comprehensive bug fixes.
- Ran Selenium automation scripts as part of regression testing.
- Updated automation scripts after sprint build deployment to PROD.

Team Lead - Software Testing

Nelito Systems Pvt. Ltd. | Nov 2018 - Apr 2019

- Led QA team testing activities and coordinated with development and business teams.

- Planned and executed functional, regression, smoke, and integration testing for web-based applications.
- Reviewed test results, tracked defects in Jira, and collaborated with developers to verify fixes.

Quality Executive

Avinex Software Pvt. Ltd. | Jun 2011 - Oct 2018

- Performed manual and automation testing, executed test cases, and reported defects.
- Began with manual QA activities, including test case execution, defect reporting, regression testing, and validation against business requirements.
- In the final months, contributed to Selenium automation by creating and maintaining automated regression test scripts.
